

# Wallet Recovery Checklist

Step	Checklist Item	Status
1	Verify your wallet recovery phrase (12/24 words)	
2	Check spelling and word order in the recovery phrase	
3	Confirm the wallet type (Bitcoin, Ethereum, etc.)	
4	Update wallet software and apps before recovery	
5	Use official wallet recovery tools only	
6	Try hardware wallet recovery if applicable	
7	Check seed phrase in multiple wallet apps	
8	Use safe crypto wallet recovery services if needed	
9	Never share your recovery phrase with others	
10	Beware of fake wallet recovery services	
11	Once access is restored, move funds to a new wallet	
12	Enable 2FA and update security after recovery	

This checklist will guide you through the crypto wallet recovery process. Always verify your wallet recovery phrase, use trusted wallet recovery tools, and avoid fake recovery services. For safe bitcoin wallet recovery, complete each step and mark it once finished.
